

WM EDDy_neu Migration – XONTRO Simulation IMS27 – Reschedule

Dear Ladies and Gentlemen,

as of February 2nd, 2023, WM Datenservice have, via “EDDy_neu – INFORMATION I057”, published the information to the public that the GoLive date planned to occur during the Easter weekend (April 06th ... 10th 2023) should be postponed. This rescheduling would then be applied to the planned migration simulation, too.

Due to this reason, the planned XONTRO simulation for the IMS27, as having been announced by BrainTrade on January 31st, 2023, and scheduled to begin on February 13th, 2023, will also be postponed to a later launch date yet to be announced by us at a later publication date.

BrainTrade staff is gladly awaiting your comments and queries regarding this issue. In the meantime, we remain with our best wishes

Yours sincerely

Markus W. Sperzel
